PROFESSIONAL SUMMARY

Informatics graduate and Product Designer focused on creating intuitive, user-centered digital products from problem understanding to high-fidelity UI and developer handoff. Experienced in user flows, wireframing, prototyping, design systems, and design QA, with hands-on experience in Flutter and front-end development that helps bridge design and implementation and enables effective collaboration with engineers.

EXPERIENCE

Product Designer - Internship Jul 2026 – Present
PT Vortex Buana Edumedia *Yogyakarta, Indonesia*

- Designed end-to-end digital product experiences for NEON UJI, covering product understanding, UX problem solving, task flows, and high-fidelity UI design.
- Explored and evaluated UX solutions using HMW, Crazy 8s, and prioritization methods to translate product requirements and user needs into actionable design directions.
- Utilized design systems and prepared design specifications to maintain consistency and support accurate developer handoff.
- Conducted Design QA across responsive behavior, interaction states, typography, spacing, accessibility, content, assets, and motion to ensure implementation quality.
- Collaborated with cross-functional teams to translate product requirements into intuitive and implementation-ready product experiences.

Freelance Photographer Jan 2022 – Present
Freelance *Yogyakarta, Indonesia*

- Manage photography projects from client brief and requirement alignment through final asset delivery.
- Communicate directly with clients to understand requirements, manage expectations, and deliver visual assets according to project needs.

EDUCATION

Sarjana Informatika (S1) — Informatika Sep 2022 – Aug 2026
Universitas Teknologi Yogyakarta *Yogyakarta, Indonesia*
GPA: 3.64 / 4.00

- Focused on Human-Computer Interaction (HCI), Software Engineering, Web and Mobile Application Development, and Databases.

Teknik Audio Video — Teknik Audio Video Jul 2019 – Jun 2022
SMK Ma'arif 4 Kebumen *Kebumen, Jawa Tengah, Indonesia*

- Studied electronic systems, microcontrollers, and device maintenance as a technical foundation.

PROJECTS

VitaCal – Calorie and Nutrition Monitoring Application — *Product Designer · Flutter Developer* Sep 2025 – Aug 2026
Technology: Figma, Flutter, Dart, Flask, REST API, PostgreSQL, Open Food Facts API, Fonnte

- Designed the end-to-end product experience from user research, user flows, and wireframing to high-fidelity prototyping, establishing a structured and user-centered experience for calorie and nutrition tracking.
- Designed and developed the Android application using Flutter and Dart, implementing BMI, BMR, and TDEE calculations based on the Mifflin-St Jeor equation for personalized calorie and nutrition assessment.
- Developed the Flask backend and PostgreSQL data layer to support user profiles and daily consumption history.
- Integrated Open Food Facts API for barcode-based food identification and nutritional data retrieval, and Fonnte for OTP-based user verification.
- Used Kaggle datasets as a data source to support food and nutrition data preparation during product development.

FrameFlow – Client Photo Selection Platform for Photographers — *Product Designer · Developer* Mar 2026 – May 2026
Technology: Next.js, Hono
frameflow.weareaap.workers.dev

- Identified and translated manual, chat-based photo selection workflows into a structured digital product experience for photographers and clients.

- Designed user flows and interfaces for gallery management and photo selection, creating a clearer and more organized client selection process.
- Developed and managed the platform using Next.js and Hono, with 19 registered users and 3 paid subscribers (2 monthly, 1 annual), while managing product operations as a Super Admin.

ORGANIZATIONS

Member → Koordinator Pendidikan Jan 2023 – Sep 2025

UKM Campoer Seni (Fotografi) | Universitas Teknologi Yogyakarta

- Coordinated the Photography Education Program (2024–2025) as Koordinator Pendidikan, planning and managing training activities for new members.
- Led the Grand Photography Exhibition 2025 as Project Lead at Teras Malioboro.
- Organized the Basic Photography Education Exhibition 2023 at Leman Art Space and served as a committee member for the Grand Photography Exhibition 2024 at Langgeng Art Foundation.
- Collaborated with cross-functional teams to organize photography exhibitions and creative educational programs.

SKILLS

Product Design: Figma, User Research, Information Architecture, User Flow, Wireframing, Prototyping, Design System, Design QA
AI & Tools: Codex, Antigravity, ChatGPT, Gemini, Git, GitHub, Postman, VS Code
Development: Flutter, Dart, React, Next.js, HTML, CSS, JavaScript, REST API
Technical: PostgreSQL, MySQL, FastAPI, Flask
